Background:

In our efforts to rationalize the product types, trade names have been assigned to different product types with catalog numbers as mentioned above.

Need for Change:

To assign unique trade names to the above mentioned products. Same will be reflected in product/package labeling and product related documentation such as certificate of quality, product insert, product data sheet etc.

How Does It Affect the User:

From a practical point, this change only assigns the trade names as described in table-1, to different products with catalog numbers as mentioned above. All performance specifications, product attributes, materials of construction (MOC) and traceability remain unchanged. The product/package labeling and accompanying product literature such as certificate of quality, product insert, product data sheet etc. will reflect the said changes.
