Subject : Improvement in identification (Laser etching) on mdi Capsule Filters

Scope : This change notification will affect the products with following catalog numbers:

(* can be any alphabet or numeral):

- D*****
- LBKO*****
- LDG*****
- LGK*****
- LK*****
- LN*****
- LTL*****
- LVL*****
- LW*****

Background:

In our efforts to provide the user better identification of the products they use, certain improvements have been done in product identification on **mdi** Capsule Filters with catalog numbers as mentioned above.

Need for Change:

Currently, capsule filters are having identification for product type, pore size, lot number, serial number, catalog number etc. laser etched on them. The complete information is laser etched collectively on capsule filter. It sometimes is difficult for the user to clearly read the laser etched information. To make the product identification more user friendly with respect to better readability, certain changes have been made in laser etching process of **mdi** Capsule filters with catalog numbers as mentioned above.

How Does It Affect the User:

From a user point of view the changes done will improve the product identification and its readability. All performance specifications, product attributes, traceability and main content of the identification information remain the same. Only the information is now laser etched in a format which makes it more readable.

Change Notice No.	Notification date	Implementation date
CN/17/13	August 05, 2017	September 05, 2017

	EXISTING IDENTIFICATION	MODIFIED IDENTIFICATION
1" Small Capsule Filter		
2" Small Capsule Filter		
5" Small Capsule Filter		
8" Small Capsule Filter
