

Change Notice No.	Notification date	Implementation date
CN/F/22/007	October 15, 2022	November 15, 2022

**Subject : Improvement in identification method of product information on mdi Large Capsule Filters**

**Scope : This change will affect the products with following catalog numbers: (# can be any alphabet or numeral):**

- LGS#54#####
- LGZ254#####
- LOLX54#####

**Background:**

This change notice has been initiated to notify our customers/users about the improvement made in the products they are using. The product information (e.g. catalog number, type, lot number, serial number etc.) for mdi Large Capsule Filters with catalog numbers as mentioned above will now be printed using Laser Etching method.

The change will have no impact whatsoever on the product performance or it's regulatory compliance.

**Need for Change:**

Currently, large capsule filters with catalog numbers as mentioned above are having identification for catalog number, product type, pore size, lot number, serial number and directional arrow printed on them by pasting a label on capsule body. This affect the aesthetic appearance of capsule filters. Moreover, the glued label can come off during use.

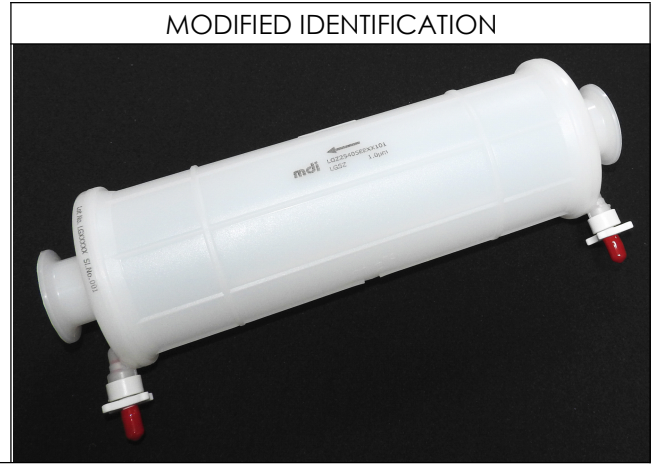

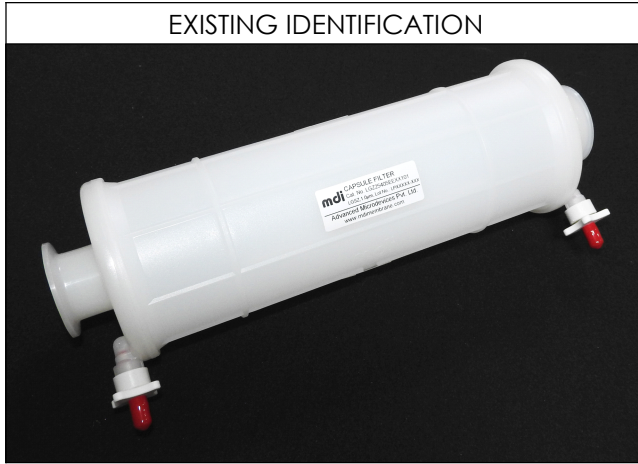

To overcome this issue, it has been decided that identification on large capsule filters with catalog numbers as mentioned above should be modified by printing all the information by laser etching method instead of pasting a label.

No change has been done in any materials of construction or any performance parameters or any critical dimensions or manufacturing/packaging process.

**How Does It Affect the User:**

From a user point of view, the changes done will improve the identification and readability under actual conditions of use. All performance specifications, product attributes, traceability and content of the identification will remain the same.

Change Notice No.	Notification date	Implementation date
CN/F/22/007	October 15, 2022	November 15, 2022

**Implementation of Change:**

**mdi** Large capsule filters having catalog numbers as mentioned in scope, manufactured after the implementation date will have the said changes. However, the available stock of **mdi** Large capsule filters with catalog numbers as mentioned above having identified with old method (Label pasted on them) will be received by you till the stocks last.
