

Reference : CHANGE NOTICE No. CP/11/01

Subject : Rationalization of length of 10" Capsule filter (All capsule types)

Scope : This change notification will affect the following products:

- **mdi** capsule filter of length 10" (All types) except large capsule filters

Background:

In our efforts to rationalize our products, the designated length of 10" capsule filters (all capsule types) except large capsule filter has been rationalized/changed.

Need for Change:

As above.

How Does It Affect the User:

From a practical point of view this change will only rationalize the nomenclature of capsule filters. All performance specifications and product attributes including actual size of filter remain unchanged.

- The designated length of the capsule filter (all capsule types) except large capsule filter is now 8" instead of 10" earlier.
- The catalog number is also affected by this change i.e. coding for capsule size in catalog number is now 57 instead of 54 earlier. e.g. catalog number for DKL/0.2 µm capsule filter is DKLX5701DDXX101 instead of DKLX5401DDXX101 earlier. A detailed explanation sheet for catalog number is attached.

Effective Date:

mdi Capsule filters of length 10" (all capsule types) shipped/ordered/manufactured after June 15, 2011 will be with said changes.
