Background:

In our efforts to rationalize the standard pack size of above mentioned products, certain changes have been done in the standard pack size (number of filters per pack) for Inline Filters and Inline Vent Filters with above mentioned catalog numbers.

Change Notice No.	Notification date	Implementation date
CN/16/02	10 th February 2016	10 th March 2016

Need for Change:

Existing standard pack size (number of filter per pack) for Inline Filters and Inline Vent Filters (37 mm and 50 mm diameter) is of 12 nos. It is very difficult to maintain the standard pack size of 12 nos. for some of the frequent order quantities such as 50 nos., 100 nos., 500 nos. etc. To cater to this need, the pack size of **mdi** Inline Filters and Inline Vent Filters (37 mm and 50 mm diameter) has been rationalized from 12 filters per pack to 10 filters per pack.

How Does It Affect the User:

From a practical point of view, this change only affects the pack size (number of filters per pack) of Inline Filters and Inline Vent Filters (37 mm and 50 mm diameter). All performance specifications, product attributes, and traceability remain unchanged. The packing box size and other attributes will remain same as before, only the quantity reduces to 10 nos.

Existing pack size with 12 Nos. (pack size code 08 in catalog number) of **mdi** Inline Filters and Inline Vent Filters (37 mm and 50 mm diameter) has been rationalized to the pack size of 10 Nos. (pack size code 02 in catalog number). All catalog numbers mentioned above will now end in 02 instead of 08. The orders may now be placed in multiples of quantities of 10 nos.

In case you have any queries, please feel free to contact our Technical Support Team at 'info@mdimembrane.com'.
